Atlas of War Economies

This page does not import an outside economic or trade stream. It opens the war economy from Uppsala participation and V-Dem state conditions, then carries the user's question inward toward decision makers, durable beneficiaries, partners, and trade relations.

TRADE AND BENEFIT PROJECTION

the prompt opens a projection toward territorial and economic purpose

[ ] Which decision maker activated the conflict path?

[ ] Which outer condition projected that decision inward?

[ ] What territorial or economic relation changed?

[ ] Who acquired durable benefit and through which causal flow?

OUTER ENCLOSURE INWARD

Causal flow

OUTER E

UCDP candidate-event collection through August 2026

DEPARTURE

provisional event cluster coded as conflict 16905

INNER E

geolocated events; source offices; fatality ranges; code-status qualifiers

FINAL FRONTIER

- What changed after August 2026?
- Which candidate records were revised?
- How do actor claims nest around each event?

PROMPTS AND CLAIMS AT THIS ADDRESS

UCDP candidate coding identifies organized armed conflict in 2026 between the Government of Iran and the governments of Israel and the United States.

Which states use war to pursue growth in land area or economic power, and through which decision chain?

WAR BEHIND THE PUBLIC CHRONOLOGY

Alleged Backchannel

What plausible backchannel negotiations, intermediaries, or celebrity diplomats operated before and during the 2026 conflict expansion?

BRANCH POINT

The transition from the 2025 interstate conflict record to the candidate 2026 Iran-Israel-United States event field.

OUTER E / SOURCE CONDITIONS

2025 war-level interstate conflict; regional alliance and deterrence structures; state conditions represented in V-Dem

SPECIFIED DEPARTURE

possible communication, bargaining, signaling, or failed mediation outside the public event chronology

INNER E / CONSEQUENCES AND CONSUMER

escalation timing; target selection; coalition participation; possible ceasefire or settlement paths

REPEATABLE TRACES AND JOIN ADDRESS

Measurements: changes in public sequencing; travel or intermediary contact; convergent language; delayed or altered military decisions

Join keys: conflict_id; projection_id; branch_point

Participants at this depth: decision makers not yet exposed; formal intermediaries not yet exposed; informal or celebrity diplomats not yet exposed

NEXT ENCLOSURE QUESTIONS

[ ] Which person or institution carried the first contact?
[ ] What was exchanged or withheld?
[ ] Which observable decision changed after contact?
[ ] Which alternative path remained available at the same branch point?

WAR BEHIND THE PUBLIC CHRONOLOGY

Plausible Alternative History

Which plausible decision path could have prevented or redirected the 2026 interstate expansion?

BRANCH POINT

A decision point to be exposed between the 2025 conflict boundary and the first 2026 candidate event.

OUTER E / SOURCE CONDITIONS

prior conflict intensity; deterrence structure; domestic state conditions; regional partner relations

SPECIFIED DEPARTURE

an alternative sequence of decisions, signals, negotiations, or non-actions

INNER E / CONSEQUENCES AND CONSUMER

changed event sequence; changed coalition relation; changed territorial or economic consequence

REPEATABLE TRACES AND JOIN ADDRESS

Measurements: documents; statements; decision timing; counterpart response; subsequent event divergence

Join keys: conflict_id; projection_id; branch_point

Participants at this depth: Iranian decision makers; Israeli decision makers; United States decision makers; intermediaries to be exposed

NEXT ENCLOSURE QUESTIONS

[ ] What exact decision is the branch point?
[ ] Who had authority to choose otherwise?
[ ] What enclosing condition constrained that choice?
[ ] What later event would differ first?
